TESTIMONIAL

We first worked with Kim at Sports Lighting in 2019 when we replaced our floodlights. Kim advised us on the installation throughout and the new lights were fitted to the existing columns and underground cables in a very efficient and professional manner

In July this year our floodlights failed on one side and Kim immediately offered his support and possible solutions. Having extensively tested the whole installation it became obvious that the 35-year-old main cable was causing the lights to fail.

We again asked for Kim's help, and he gave us several options, and this ultimately led to us replacing the main cable.

Despite being very busy Kim fitted us into his schedule as he recognised the impact of having no lights on our Club and games having to be postponed.

From start to finish Kim and James took us through the replacement of the cable with absolute professionalism and were always available to meet on site or on the telephone.

We would like to record our thanks to Sports Lighting and are happy to recommend them for a first-class service

Bob Chard
