

Two years ago GTFC started the process of installing floodlights at our new ground WoodWater, with Foundation funding. We needed 3 quotes for the funding application, of some 7 suppliers contacted only 3 responded. Sports lighting was head and shoulders above the rest. Both in the quality of their offer and their professionalism.

The foundation accepted our preference and we went with Sports Lighting.

The installation was as good as we expected, our lights have been up and running for some 7 weeks, our lighting levels are superb, far higher than the required minimum.

We also feel safe in that, was there to be any issue, not that we expect any, as Sports Lighting use their own labour, not subcontractors, they will be on site the next day, not the 6-7 weeks that we have heard some other suppliers can take.

If anyone is looking for area lighting then sports lighting need to be at the top of your list.
