Dear Kim

## **Testimonial for Sports Lighting**

I feel moved to write and thank you most sincerely for the professional and helpful service you provided throughout the design and installation phases for our recent floodlight upgrade to a new LED system.

The design service and advice given to Willand Rovers by you and your team during the tender process was second to none and put you head and shoulders above the other bidders. This together with your detailed design submission and your all-inclusive and competitive price resulted in your company being selected to install our new lights.

Our installation did suffer a hiccup in that, after close inspection of our existing support brackets, you decided new brackets would be required on each of the eight floodlight columns to support the additional weight of the new lighting units. This resulted in you immediately aborting your site installation visit after just one hour, organising the necessary new brackets and returning just one week later to install the new brackets, fit and commission the lights.

This demonstrates the conscientious manner in how your installation team goes about their work and the flexibility, adaptability and accommodating nature of your service.

Willand Rovers now can boast one of the best non-league floodlighting systems in the south west of England: a system that we are pleased to say was installed by Sports Lighting.

I wholeheartedly recommend Sports Lighting to any club considering a floodlight upgrade: I would certainly, at the very least, encourage you to call Kim for his expert advice.

Yours sincerely
