We are thrilled to share our experience with the recent installation of LED floodlights at Warminster Town Football Club. From start to finish, the process was seamless, and the results have far exceeded our expectations.

Kim and his team were professional, efficient, and dedicated to ensuring that every detail was perfect. Their expertise and attention to detail were evident at every stage, from the initial consultation to the final switch-on. They worked tirelessly during the two-day installation.

The new LED floodlights have transformed our facilities. The quality of the lighting is outstanding, providing bright, even illumination across the entire pitch. This has significantly improved visibility during evening matches, enhancing both player performance and spectator experience. The energy efficiency of the LED technology is also a major plus, reducing our electricity consumption and environmental footprint.

Our club members and visiting teams have all commented on the dramatic improvement. The enhanced lighting has boosted the overall atmosphere at our evening games, making them more enjoyable for everyone involved.

We would highly recommend Sports Lighting to any club looking to upgrade their lighting system. It has been a game-changer for Warminster Town Football Club, and we are incredibly grateful for the positive impact it has had on our community.

Thank you for your outstanding service and for helping us light up our future.

Kind regards

Rob McFerran
